The FALCON F7 presented by Jeff Lemke

Everything great starts from a single, powerful idea. Born out of pure sports car passion and the unquenchable desire to fill the void in the competitive and repetitious world of vehicle exclusivity for a hand crafted, uniquely American, exotic ultra high performance sports car. Welcome to Falcon F7. Falcon Motor Sports is located in Holly Michigan, which is the birthplace for concept and development of the original Falcon F7 show vehicle, and test vehicle #1. Everything necessary from designs, exterior body tooling molds, as well as interior fixtures are completed and owned by Falcon Motor Sports. The manufacturing experience to fabricate and build the Falcon F7 was derived from first-hand experience plus many years in the component manufacturing business as well as the development and fabrication of the primary prototype. The aluminum monocoque chassis provided by Superlite cars in Clinton Township, is proven in racecar design with over three years of development and safety testing in the racing industry. The chassis is a proven winner, consistently coming in first place, in unlimited class racing events. Falcon Motor Sports primary goal is to manufacture excellent, high-quality, hand crafted, high-performance, street machines for high-end automotive enthusiasts with a passionate, renegade spirit, for years to come.

Extreme Power To Weight Ratio With 620 HP At 2785 Lbs.

- Hand-assembled, 7-liter, naturally-aspirated all-aluminum mill engine
- 620-horsepower and 2,785 lbs. for an extreme power-to-weight ratio

Please mention Business Recognition when making ticket reservations if you wish to have your business recognized at the meeting.
