**REASON:** Each of our industries and businesses rely on us as individuals and our societies to promote the benefits achieved by focusing on the correct and highest standards in knowledge, skills, and practices:

- Support and contribute to SAE's VISION of Advancement of the Mobility Community to serve Humanity.
- Support and contribute to the VISION of all SVEC Societies and all Local and global engineering societies.

**STATUS:** Our industries, businesses and co-workers don't know who we are as individuals and societies that sustain the knowledge, skills, and practices that are so important to them, to us, and to our families and communities:

- Global vs. Local - They are one and the same?
- We as individuals and each business around the world live and work (or are based) locally.
- The products and services we all produce serve others around the world, either directly or indirectly.
- Likewise, the products, materials and services we use are partially provided or influenced by global sources.
