The Fully Networked Vehicle Vehicle to X Communications at the Geneva Auto Show

Dr. Gover serves IEEE as Vice President of the Board of Governors of the IEEE Vehicular Technology Society and he was Vice Chair of the 2009 IEEE Vehicular Power and Propulsion Conference held in Dearborn. His VTS duties include serving as chairman of a session on Vehicle to X Communications at the Geneva Auto Show workshop, The Fully Networked Vehicle. His presentation will summarize the highlights of the workshop presentations.

Speaker: **Dr. James E. Gover**
Professor,
Kettering University

Dr. Gover has BS and MS degrees in electrical engineering and his Ph.D. in nuclear engineering. His Ph.D. dissertation was a study of the thermo-mechanical response of uranium alloys to pulsed electron beams. Of his 35 years at Sandia National Laboratories he spent about 15 years studying the thermo-mechanical, electrical and electromagnetic phenomena generated in electrical systems by pulsed nuclear radiation. He was awarded the title of IEEE Fellow for this work. He also spent 5 years working on science and technology policy for Congress and the President while serving as IEEE Congressional Fellow and Competitiveness Fellow. For this work he was awarded the IEEE Citation of Honor. At Sandia he also spent seven years managing the development of energy systems. At Kettering he teaches courses in power electronics, EMC phenomena in hybrids, and Packaging and Systems Integration of hybrid vehicles.

Reservations required by
Noon Friday, October 9th
