# Energy: Technologies and Global Outlook

Tours of the newly remodeled engineering laboratories start at 10:00 a.m. in Pioneer Hall. Visit the SVSU web-site for a campus map ([www.svsu.edu](http://www.svsu.edu)).

There will be student project displays, and a lecture and discussion on global energy concerns, at 11:00 a.m. The lecture is arranged by the Society of Automotive Engineers, and the Saginaw Valley Engineering Council.

11:00 a.m. Pioneer Hall, Room 240

"ENERGY: TECHNOLOGIES AND GLOBAL OUTLOOK"

DR. JOHN L. GARDON

(Former Vice-President and Research Director of AKZO Nobel Coatings Co.; Chairman of Polymeric Materials, Science and Engineering Division, American Chemical Society).

Mr. Gardon's presentation will deal with the following subjects:

1. Greenhouse and toxic gas emissions; global warming.
2. Our dependence on Middle Eastern fossil fuels.
3. Thirteen different sources of energy: costs, benefits, risks, availability, and future potential.
4. Practices in the U.S. and in various foreign countries.
5. Global policies.

Meals are available in the Student Food Service Building (all you can eat for \$8.00) or the Student Activity Center Building (snacks & ice cream, etc.)

On display will be a 1914 Detroit Electric manufactured by the Anderson Car Company courtesy of Dr. Gamez
